

RISHI RAJ

B.TECH STUDENT | ASPIRING SOFTWARE DEVELOPER

rishiraj438gt@gmail.com | +917909050035 | [LinkedIn](#) | [GitHub URL](#) | [LeetCode](#) | [HackerRank](#)

OBJECTIVE

Full Stack Developer skilled in **JavaScript, TypeScript, Python, Golang, React.js, Node.js**, and **SQL/NoSQL** databases. Proficient in DevOps – **Docker, Kubernetes, CI/CD pipelines, Prometheus**, and **Grafana**. Strong DSA fundamentals (**LeetCode 1500+**), active **open-source contributor**, passionate about building scalable production-grade web applications.

EDUCATION

Sainik School Tilaiya

• Scored 73% in 12TH board exam, 81.9% in 10TH board exam .

Bachelor of Technology in Computer Science and Artificial Intelligence

Aug 2024 - Jun 2028

Newton School of Technology

Second-Year Student | Expected Graduation: 2028

PROJECTS

• HELIX

Python, Next.js, Postgres (Prisma/SQLAlchemy), Docker, GitHub Actions, OpenAI/Groq API, Clerk, yt-dlp

- *Architected AI News Platform: Built a scalable aggregator processing 1k+ daily sources via containerized automated pipelines (Python/Next.js/Postgres).*
- *Engineered Data Ingestion Engine: Developed modular scrapers (yt-dlp, RSS) orchestrated by GitHub Actions for robust daily data syncing.*
- *Implemented AI Content Curation: Deployed LLM agents (OpenAI/Groq) to rank and summarize news, achieving 95% noise reduction.*
- *Built Real-time Webhook System: Integrated Clerk auth webhooks for instant user provisioning and seamless profile synchronization.*
- *Automated Cloud Infrastructure: Established Dockerized CI/CD workflows for reliable scheduled execution and high availability. [\[Project Link\]](#) [\[Code URL\]](#)*

• AeroPrep

Next.js, TypeScript, Node.js, PostgreSQL, TailwindCSS,Docker

- *Built "AeroPrep", an AI-powered interview platform with a responsive, mentor-like UI using modular React components and Framer Motion for smooth animations.*
- *Utilized Next.js App Router and Prisma ORM for efficient server-side data fetching and type-safe database interactions, optimizing application performance.*
- *Integrated AI and Monaco Editor for real-time technical interview simulations, featuring PDF resume parsing and adaptive feedback generation.*
- *Deployed on Vercel; planned features include WebRTC video analysis and comprehensive automated testing with Jest. [\[Project Link\]](#) [\[Code URL\]](#)*

CERTIFICATION

[Responsive Web Design Certification - freeCodeCamp](#)

[Certified Meshery Contributor - Layer5](#)

SKILLS

Languages: JavaScript, TypeScript, Python, Golang **Frontend:** React.js, Next.js, Tailwind CSS, Framer Motion, Flutter

Backend: Node.js, Express.js, Prisma ORM, Hono Framework **Monitoring:** Prometheus, Grafana

DevOps & Cloud: Docker, Kubernetes, GitHub Actions, CI/CD, AWS, Vercel, Cloudflare Workers

Tools: Git, Jest, Zod, Pydantic, Pandas, Monaco Editor, Parcel **Databases:** PostgreSQL, MySQL, MongoDB, SQLAlchemy

ACHIEVEMENTS

Open Source — Layer5 & Meshery (CNCF): Member of contributor in Layer5 org with 50+ pull requests reviewed and 30+ PRs merged. Most recent contribution: refactored the entire Sistent design system page — [PR #7408](#).

Competitive Programming: LeetCode 1500+ rating with consistent contest participation, strengthening algorithmic thinking and problem-solving efficiency.
